

SKID & MINI SKID STEER ANGLE BLADE

KWIK-WAY
A HitchDoc COMPANY

Standard Features:

- **Dirt and Snow Management** – Primarily designed for dirt, heavy snow management or light material but don't let that limit what you move
- **Overbuilt and Out Performing** – Manufactured with American steel and inspected against the highest quality standards is why our employees are so proud of this Midwest made product
- **Double Hydraulic Cylinders** – Quick connect couplers allow for easy attaching to any skid steer or mini skid steer
- **Large Cut Angle Rotation** – No more worries on which way to move earth or snow, this blade can cut up to 30° rotation to the left or to the right
- **Easy Transitions** – Use this blade for dirt work or snow management with a quick change of the trip springs and lock out bolts
- **Adjustable Depth Guides** – Manually change around the spacers on the skid shoes to modify blade height to control blade height and surface contact
- **3R Cutting Edge** – Save time and money with our 3R Cutting Edge which are removable, reversible and replaceable
- **Universal Mount** – Allows for one standard attachment for skids steers and mini skid steers, no need for special hook-ups or attachments
- **Rolled Steel Blade** – We take the time to roll our thick, American steel for increased pressure resistance and minimize potential breakdowns by offering one solid steel blade
- **Continual Improvement** – At HitchDoc, we take our products out year after year and push them to the breaking point, whether moving logs, earth, snow, rock, mulch, we try it all to maintain our quality levels

**Rock Solid Blades with
Industry Leading Quality**

SKID & MINI SKID STEER ANGLE BLADE

Optional Features:

- **8 inch Blade Extension** – Attaches to the top of the blade and made from steel to increase capacity
- **Rubber Cutting Edge** – This 1 inch thick, 6 inch wide option minimizes wear on the plowing surface
- **Float Kit** – Available on skid steers above 50 HP, this option operates independently from the machine to self-adjust the blade-surface contact
